PROFESSIONAL SUMMARY

Aspiring Full Stack Developer (MERN) with adaptability to dynamic environments. Skilled in building scalable web applications and experienced in AI/Generative AI technologies, including chatbot development and integration with APIs.

WORK EXPERIENCE

Ikites technologies Pvt ltd

Aug 2024 - Present

Full Stack Developer

- Designed and implemented Healthy People Project, a full-stack web application using React.js, Flask (Python), MongoDB, and Docker, enabling efficient task and service management.
- Developed a WhatsApp AI Bot for CK Birla Hospital, automating appointment booking, cancellation, rescheduling, and payment integration using Razorpay API and WhatsApp Cloud API/Kerix.
- Built RAG-based (Retrieval-Augmented Generation) chatbots powered by LLMs (OpenAI, ChromaDB) for intelligent and context-aware conversations.

Masai School

Full Stack Web Developer - Intern

Aug 2023 - Feb 2024

- Gained hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js during a rigorous internship at Masai School.
- Collaborated on real-world projects that strengthened teamwork and communication skills while working with industry-relevant technologies through Masai's project-based learning model.
